Emma Benozzi is an Italian graphic designer and researcher based in the Netherlands. She studied design at the Royal Academy of Art in The Hague and is currently a student of Werkplaats Typografie, Amsterdam.

Today, she develops her design practice around the research and restoration of forms of ancient knowledge—sourced from folklore, traditions and peasant societies—rooted in ecology. This research translates into designed solutions or radical outlets for the society, to counter its geo-political failures and disruptions.

PROFESSIONAL & PERSONAL SKILLS
